

SUPPORTING SCIENCE TEACHING ADVANCEMENT THROUGH INQUIRY

**Save the date! The final European Conference of SUSTAIN //
Berlin, Germany // October 10 & 11, 2016**

The **SUSTAIN project, Supporting Science Teaching Advancement Through Inquiry**, aims at supporting the implementation at school of a more relevant and effective approach of the **education for sustainable development (ESD)** thanks to the specific contribution of **inquiry-based science education (IBSE)**.

During almost three years, SUSTAIN has produced pedagogical contents, tools and teachers' professional development activities that foster among children the scientific understanding of issues and challenges linked to sustainable development, and thus reinforce their future ability to act as informed and responsible citizens.

The Final European Conference of the SUSTAIN project is organized by the Freie Universität Berlin.

Its main goal is to present the results of the work carried out by the network, in particular the handbooks produced by the 3 topic groups (Food, Energy & Everyday objects), and highlight the contribution of the network to the development of ESD through IBSE.

Target audience: educational experts, teachers, educators, education policy makers and other stakeholders actively involved in ESD and IBSE at school.

Registration deadline: September 30, 2016

Please find all further information and the registration link here: <http://www.bcp.fu-berlin.de/natlab/lehrkraefte/sustain/index.html>

In case you have any questions do not hesitate to contact Ulrike Jeggle after 15th August.: ulrike.jeggle@fu-berlin.de
